# ENHANCED COMPLIANCE (EC)

PCI DSS Compliance, Simplified.

## Payment Security For QAD Customers

**CUSTOMER SERVICE • ACCOUNTS RECIEVABLE • ECOMMERCE**

Your executives have committed to complying with PCI DSS. Not doing so exposes your company to fraud, fines, and reduced customer trust. We make compliance as simple as possible for your organization, meaning significantly reducing time, complexity, cost, and risk for merchants that would otherwise need to complete Self-Assessment Questionnaire D (SAQ D-MER). We protect your customers' payment card data collected in your call centers and via your ecommerce sites. We also provide the best solution for managing the fast-growing use of virtual card numbers (VCNs). Other compliance products cannot process VCNs, causing increased customer dissatisfaction. CCI+EC takes care of it all.

### KEY FEATURES

- Transfer of Risk • Shielding Workstations from Cardholder Data •
- Ecommerce Protection • Call Center Security •
